### **DETAILED ACTION**

1. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Group Art Unit 1648**. Applicant's preliminary amendment is acknowledged and entered. Claims 1-15 and 17-24 are pending.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1-15 and 17-18, drawn to a method for culturing viruses. The special technical feature relates to a virally infected sample contacted with permissible cells in a medium containing an activating agent.
- Group II, claim 19, drawn to a method of using viral particles. The special technical feature is obtaining antibodies by immunizing with viral particles.
- Group III, claims 20-22, drawn to viral particles. The special technical feature is a viral particle.
- Group IV, claim 23, drawn to a ligand. The special technical feature is a ligand that modulates, represses or inhibits the endocytosis pathway.

Art Unit: 1648

- Group V, claim 24, drawn to a method of using infected cells. The special technical feature is a method of screening antiviral molecules with permissive cells.

Groups I-V do not share a special technical feature. Therefore, the claims lack unity. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
